DIRECT-VENT LUXURY FIREPLACES

Technology Meets Magic.

Every Chateau fireplace includes a programmable remote control to independently operate the dual burners and the built-in dimmer lighting. This simple, intuitive remote features day-of-week programming so you can set it to cycle off at bed time and cycle on in the morning, so you wake to a warm fire.

The Chateau's Green Earth Preferred Multi-function Control system eliminates the standing pilot – saving energy and money. When you want fire, just press the button. In the event of a power outage, the built-in battery-backup system allows your Chateau fireplace to continue to operate. With 50-percent turndown, the Chateau

lets you heat a little or a lot.

The Chateau fireplace includes a fireplace barrier screen to protect you and your family from inadvertently touching the hot glass.
